

Learn Math.

Title 1 Permission Form

Dear Parent/Guardian:

As part of our goal to ensure that all students experience success at school, The FAIR School, Downtown campus, provides Title 1 support to many of its students. In grades kindergarten through fifth grade, we use weekly formative assessments in the area of mathematics. We use these assessments to identify students who need extra support or reteaching of a particular math skill or concept.

Throughout the year, your child may be identified as needing extra support with his or her math skills. This instruction may be provided within your child's regular classes, in small groups outside of the classroom, or individually at various times throughout the school day. The intent of this service is to give your child the help he/she needs to meet or exceed grade level expectations in mathematics.

Please direct any questions you may have about the program to either your child's teacher or one of the names listed below. The school will assume that you agree to have your child receive this instructional support unless you indicate otherwise within a week of receiving this letter.

Thanks for your continued support.

Sincerely,

Sue Littlefield, Title 1 Instructor
